Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In claim 19, line 4, "said" has been changed to --an--.

Comment

The formal drawings were not received with the amendment filed on 1-21-2004. Such formal drawings should be timely resubmitted.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-21 are allowable over the prior art of record because none of the prior art of record taken alone or in combination thereof shows or fairly suggests the claimed reciprocating cutting tool in which a swivel bracket is connected to a foot plate of the reciprocating cutting tool and disposed to exert a force to a rear edge of a blade of the cutting tool.

Claims 22-27 are allowable over the prior art of record because none of the prior art of record taken alone or in combination thereof shows or fairly suggests the claimed

reciprocating cutting tool which includes a swivel bracket mechanism selectively positioned to exert a force to a rear edge of the blade and cause the plunger to exhibit pivotal movement.

Claim 28 is allowable over the prior art of record because none of the prior art of record taken alone or in combination thereof shows or fairly suggests the claimed reciprocating cutting tool in which a selector mechanism for alternatively selecting scrolling and orbital movement has a rocker member selectively positioned to exert a force to a rear edge of the blade.

Claim 29 is allowable over the prior art of record because none of the prior art of record taken alone or in combination thereof shows or fairly suggests the claimed reciprocating cutting tool in which a drive mechanism interconnects the motor and the plunger and supports the plunger to facilitate reciprocating, scrolling and orbital movement, and the drive mechanism is configured to exert a force to an attached blade during orbital operation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
